Election/Restrictions

DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27, drawn to a method an administration of a business, including notifying employees and other partners associated with the business of certain events, and the rewarding of employees base upon performance, classified in class 705, subclass 2.
 - II. Claims 28-66, drawn to providing of personalized services and a personalized interaction between two individuals, classified in class 705, subclass 1.
2. Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination make no mention of the establishment of an audio/video channel or is it necessary to carry out the invention of Group 1. The subcombination has separate utility such as providing a personalized interaction between two individuals on a real time basis via video conferencing.

Art Unit: 3629

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
